Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a data network, a transmission link, each of at least one transmission link having a transmitter and a receiver, an actual level reserve in the direction of a sensitivity limit and thus between an actual transmitting power of the transmitter and the actual sensitivity limit of the receiver; and at least one transmission link in a test mode, an actual level reserve in the direction of an overload limit and thus between the actual transmitting power of the transmitter and the actual overload limit of the receiver must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Figure legends are required for every features in the drawings.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New
